Child Surgical Foundation has been working with a zeal since 36 years. We have innovated conventional healthcare where a child and his parents had to wait for months to get the recommended surgical treatment. With the advent of Sehat Sahulat Card and MTI healthcare is under continuous transition and lots of concerns are raised regarding how the system would mature to start benefitting the masses. CSF is working in alignment with MTI and SSC as a flag bearer to share burden of masses insofar that the mission statement ; No Child awaits surgery descends from the same thought process.

The whole concept is to bring welfare in private sector and endorse quality care in state of the art centers and accomplished and internationally accredited surgeons in a nominal expense.

Having opened the Head-office in G-8, word is spreading fast and in mere 6 months more than a 1000 patients were catered in a number of centers in affiliation with Child Surgical Foundation.

CSF sets a new record by inauguration of Paeds Operation Theater

Child Surgical Foundation has been serving the masses tirelessly and has succeeded to cater to a phenomenal influx of patients. The unmatched number of cases mandated a separate Neonatal and Paediatric operation theater. With the kind acknowledgment by Prof. Nasira Tasneem, Care plus Hospital established a specified Operation Theater to accommodate patients below the age of 12. The specialized paediatric equipment along with paediatric anaesthetists renders this facility as top most in terms of paediatric surgical procedures. A separate Paediatric ward is established as well NICU covers all the concerns of both surgeon and parents.

Shaking hands with RJS : A pledge to serve Trans community

RJS has been at forefront to address the social issues of Trans community. The medical neglect of Trans community highlighted the need of a collaborative effort to provide holistic support to the said community. Since 36 years CSF has been treating patients with atypical gender by medical, surgical and hormonal treatments. CSF stepped forward to facilitate RJS by signing a Memorandum of Understanding where all medical, surgical, hormonal and Psychological assessment and treatment of Trans community would be provided in a swift and comprehensive manner. RJS and CSF go hand in hand when it comes to Trans health and community recognition.
