- Intestinal atresia repair
- Malrotation with volvulus (Ladd's procedure)
- Necrotizing enterocolitis surgery
- Meconium ileus surgery

COMMON PROCEDURES:

Excision of dermoid/epidermoid cyst Lipoma excision Lymph node biopsy Abscess incision & drainage Herniotomy, Hydrocele Repair, Orchidopexy, Umbilical Hernia Repair, Circumcision, Frenotomy, Meatotomy, Proctosigmoidoscopy, and Clubfoot Tenotomy.

HYPOSPADIAS PROGRAM (150+ PROCEDURES)

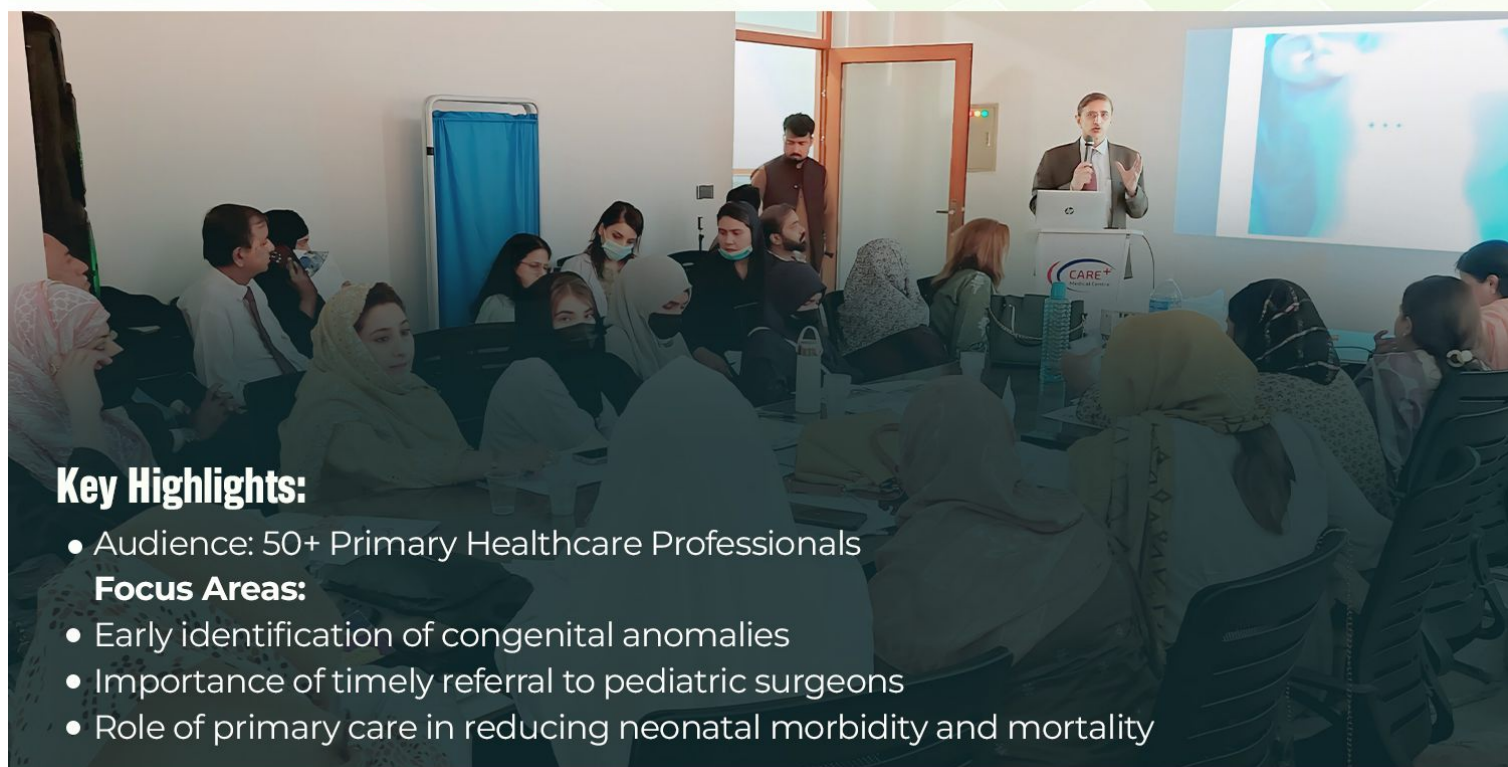

More than 150 hypospadias surgeries were performed, including distal, mid-penile, proximal, two-stage, and revision repairs, with excellent functional and cosmetic outcomes.

COLORECTAL SURGERY (10+ MAJOR CASES)

Over 10 major procedures were performed, including PSARP, pull-through surgeries for Hirschsprung disease, stoma procedures, and constipation management. Our bowel management program continues to enhance long-term patient outcomes.

ACADEMIC & TRAINING ACTIVITIES

Key Highlights:

- Audience: 50+ Primary Healthcare Professionals

Focus Areas:

- Early identification of congenital anomalies
- Importance of timely referral to pediatric surgeons
- Role of primary care in reducing neonatal morbidity and mortality

This initiative strengthens collaboration between primary care providers and specialized surgical services, ensuring early diagnosis and timely intervention.

CONCLUSION

April 2026 stands as a landmark month for Child Surgical Foundation highlighting:

- High-volume surgical efficiency
- Expansion of specialized programs
- Strong academic engagement and outreach

Our mission remains steadfast:

“No child should be deprived of surgical care due to financial constraints.”

With continued dedication, teamwork, and innovation, CSF is steadily advancing as a leading center for pediatric surgical excellence in the region.
